

## **Energy Edge Celebrates 10 Years of Delivering Strategic Energy Solutions**

### **Company Marks Occasion with Rollout of Complete Re-branding and New Website**

Houston, TX (PRWeb) December 6, 2019

Energy Edge, a leading provider of energy management consulting services, is proud to celebrate ten years of delivering energy advisory services to some of the largest electricity and natural gas consumers in North America and parts of Europe. The firm currently offers services in 24 competitive electricity and natural gas markets.

Over the past ten years, the company has grown from its roots in energy procurement and risk management consulting services to now offering a full suite of energy advisory services including renewable energy procurement, demand response, and on-site generation. In addition to growing its service offering, the company has expanded its geographic footprint as well. Energy Edge now provides services in many of the competitive electricity and natural gas markets globally, including the United States, Canada, the United Kingdom, and Germany. The firm expects to continue expanding on both fronts in the coming years.

On the occasion of the company's tenth anniversary, Energy Edge is rolling out a complete re-branding and new website, [www.energyedge.com](http://www.energyedge.com). The re-branding focuses on the firm's broadening service offering and geographic reach.

"We're very proud of all that we've accomplished in ten years and extremely grateful for the many relationships we've formed along the way," said Matt Hobson, Principal of Energy Edge Consulting. "We look forward to continuing to expand our horizons. As the energy industry experiences great change, we will be there to guide clients through the challenges and opportunities ahead."

#### **About Energy Edge Consulting**

Energy Edge offers strategic energy management and renewable energy solutions to a wide range of businesses and institutions. The Energy Edge team has extensive capability in various aspects of the electricity and natural gas industries, and the knowledge and expertise from this experience is leveraged to deliver value to clients. Energy Edge provides services in the United States, Canada, the United Kingdom and Western Europe.
